# CLEAN WATERWAYS 2023

This year's CLEAN WATERWAYS is taking place at the Hilton Denver City Center in Denver, CO, April 11-13. CLEAN WATERWAYS serves the response industry in prevention, preparedness and response in the inland environment for oil and hazardous materials spills and other incidents. At CLEAN WATERWAYS, you will have the opportunity to connect with governmental units and diverse response organizations, including maritime, facilities, rail, and pipeline during dedicated networking activities, conference sessions and on the exhibit floor. You will walk away with new connections and ideas that can be applied directly to your work and the environment your company operates in.

The conference sessions we have planned are led by experts in both industry and government and offer practical information on incident prevention and response challenges specific to inland waterways. In addition to the conference sessions, the conference will host 50+ exhibitors, two networking receptions and multiple networking breaks.

## WHY ATTEND

As an environmental and response professional working in the inland environment, it is important to stay up-to-date on best practices and lessons-learned for incident prevention and response and maintain relationships with all parties involved in a response. At the CLEAN WATERWAYS Conference, you'll have the opportunity to connect with attendees and exhibitors during dedicated networking activities, conference sessions, and on the exhibit floor, where you can check out the latest technologies advancing the industry.

- Conference sessions offer practical information on incident prevention and response challenges specific to inland waterways and give attendees direct applicability to their work & environment their company serves
- Ample opportunities throughout the conference to network with the broad spectrum of individuals, companies, associations and governmental units involved in incident prevention and emergency response in the inland environment
- An intimate event setting allows for attendees and exhibitors to easily connect and conduct business
- Vendors are on-hand in the exhibit hall ready to help you find solutions to your environmental and emergency response needs

#### KEYNOTE SESSION: Bettering Human Lives: The Vital Role Oil and Gas Production Plays in Lifting People out of Poverty and Opening the Door to Modern Life

**WEDNESDAY, APRIL 12 • 9:15 AM - 10:00 AM**

Self-described tech nerd turned entrepreneur, Mr. Chris Wright serves as Chief Executive Officer and Chairman of the Board of Liberty Energy. Chris is a dedicated humanitarian with a passion for bringing the benefits of energy to every community in the world. This passion has inspired a career in energy working not only in oil and gas but fusion, solar, and geothermal. Chris embraces all sources of energy if they are abundant, affordable, and reliable.

Chris has become a bold advocate, bringing rational thought to the energy dialogue. He has spoken on energy and the merits of the Shale Revolution to the UK House of Lords, and state and federal lawmakers, with multiple appearances on network TV, documentaries, and podcasts. Recently, Chris' #ThankYouNorthFace campaign went viral with over 5 million views, forcing a sober discussion on the multiple uses of oil and gas in products.

Chris grew up and currently lives in Colorado with his wife, Liz. He is a passionate father, skier, cyclist, climber, and outdoor enthusiast. He serves on the board of numerous nonprofits including PERC, ACE Colorado, ACE Montana, PRI, and the YCCF.

## **1A: What's the Contingency Plan?**

**WEDNESDAY, APRIL 12 • 10:30 AM - 12:00 PM**

Inland Area Contingency Plans are often combined Regional/Area Contingency Plans (RCP/ACP), and the areas covered are regional in scope, lacking localized geographic details necessary for effective oil spill response planning and coordination. Industry Facility Response Plans and Integrated Contingency Plans for rail, pipelines, terminals, and refineries are required to align with the RCP/ACP and consider the resources at risk. In the inland zone, EPA develops Sub-Area Contingency Plans or Geographic Response Plans to provide a greater level of tactical response planning information and guidance on protecting sensitive areas, to assist industry in planning for initial response actions and focusing on the areas that are most vulnerable to oil spills. Speakers comprised of industry and government planners will provide updates on contingency planning initiatives in the inland zone, answer questions, and provide insights into the path forward for Area Contingency Planning

**1B: Is Your Industry Resilient Enough for Today's Natural Disasters and Climate Extremes?****WEDNESDAY, APRIL 12 • 1:00 PM - 2:30 PM**

Any incident can be stressful. Add to it a natural disaster, and now there is increased complication to the situation. Presenters will provide insight into complex incidents that occurred during the aftermath of a natural disaster, including train derailments and a pipeline release. While these can be challenging on their own, a natural disaster on top of it raises complexity.

CHAIR: Cynthia Gulde, Regulatory Affairs Advisor, Chevron EMC (a Chevron U.S.A. Inc. Division)
